REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claim 1 has been found to be allowable over the prior art because the prior art fails to teach or suggest a mechanical time piece provided with a rotational angle control mechanism constituted such that in a state in which a mainspring is completely wound up, air resistance is applied to rotation of the balance with hairspring and in a state in which the mainspring is completely rewound, the air resistance is not applied to the rotation of the balance with hairspring, in combination with the remaining limitations of said claim.

Claims 2-5 have been found to be allowable as being dependent upon the allowable claim
